

## Character Dialogue: Gullius

### **Biography:**

Gullius is a two-year-old seagull fledgeling from North-East England. A bold youngster with a strong sense of adventure, he's very confident and secure in himself for such a new bird. His strong relationships with his parents mean he cares more than the average gull about family and flock. He often dives into situations head-first without always considering the consequences. He has a dry sense of humour and a quick wit, shown in his snappy comebacks and one-liners. He's a brave and tenacious leader who isn't afraid to direct other gulls in a crisis. Gullius has a noticeable, friendly North-East accent that isn't too strong for the general public to understand. He uses some colloquialisms and local phrases that the player will come to learn through gameplay.

### **Voice Acting Notes:**

North East accents are frequently rated as the UK's friendliest. However, they can be quite strong for non-locals to grasp and there are variations within the regional dialects. Example voices: young men from Teesside, County Durham or Middlesbrough. One reference would be Jamie Bell in Billy Elliot (2000) as an ideal voice/attitude.
